

**AQUA-ZYME DISPOSAL SYSTEMS**

# SLUDGE DEWATERING CONTAINERS

**BUILT TO DEWATER. BUILT TO HAUL. BUILT TO LAST.**

## APPLICATIONS

- Municipal biosolids
- Septic tank sludge
- Grease-trap waste
- Food-processing waste
- Lagoon and tank cleanouts
- Industrial sludges and slurries

## EFFICIENT SEPARATION. PRACTICAL DISPOSAL.

Aqua-Zyme dewatering and separation containers are engineered to collect, separate, transport and unload sludge, slurry and wet solids. Integrated filter surfaces retain solids while allowing free liquid to drain, reducing material volume before hauling, landfill disposal or approved beneficial reuse.

**INTEGRATED FILTER SYSTEM**  
FLOOR, SIDEWALLS AND CENTER WALL

## BUILT FOR THE WORK

- Heavy-duty carbon-steel construction
- Round-bottom design with permanent filter media
- Multiple drain ports for efficient liquid removal
- Roll-off compatible for transport and unloading
- Durable epoxy primer and polyurethane topcoat
- Polymer systems, consulting and support available

**20,000-25,000 GALLONS**

**DEWATERED WITH SOLIDS READY  
FOR HAULING IN ABOUT 24 HOURS\***

\*Performance varies by material, solids content, chemistry, loading method and site conditions.
